1932

Linwood Iris Gardens

A. H. COVERT
BLANCHE COVERT

1351 SOUTH HYDRAULIC AVE.
WICHITA, KANSAS

INTRODUCTORY

We realize, in iris, as other plants, it is necessary to drop some from our gardens to make room for plants of better quality. This list does not contain some listed last year, however no apology is offered for continuing to list some of the old timers. They have merit and are selling at prices permitting all to have a really attractive planting at a very reasonable outlay.

ALL iris carried in this list are named varieties included in the ALPHABETICAL CHECK LIST of the AMERICAN IRIS SOCIETY. Ratings will be furnished on any varieties which have been introduced sufficient time to carry rating.

PRICES quoted include delivery in the city and postage for out of town orders of one dollar or over.

TIME OF DELIVERY will begin June 20th or as near that date as weather permits. This time has been proven beyond any doubt to give the best results in our climate, plants becoming somewhat established before the extreme hot weather. It will be our aim to meet purchasers convenience as nearly as possible.

VARIETIES are guaranteed true to name. Purchase price only will be refunded on any stock not true to name.

ADDITIONAL STOCK FREE. On orders of \$10 or more, purchaser may choose 20 per cent additional stock.

ZINC LABELS—Buying plants true to name and labeling them with permanent labels not only insures one more pleasure in their gardening, but prevents duplicate purchases. Know your varieties by their proper names. Early in our iris ventures we tried various types of labels and believe the zinc label as efficient and permanent as any. These will be furnished in appropriate size securely attached to No. 10 galvanized wire, ready for immediate use.

Label and wire stake complete 3 cents.

Bearded Iris

- Aareshorst—Very catchy shade of bronze metallic red ----- Each \$1.00
- Acheron—Rich violet-purple. Extremely profuse bloomer. ----- Each 50c
- Afterglow—Unusual yellow blend with faint trace of lavender. ----- Each 20c. 3 for 40c

 Early ----- Each 25c. 3 for 50c
 *This prefix indicates these varieties grow rhizomes
 below average size. However, most of these lit-
 tle fellows are quite rugged and desirable, many
 carrying high ratings.

CRESTED IRIS

Cristata—A native creeping iris requiring careful
 and special treatment. Very tiny. 25 cents each.

Tectorum—Light blue. Fortunately this variety
 seems to stand Kansas climate. 50 cents each.

ROCK PLANTS

No group of plants seem to do better in the sunny
 rock gardens during the hot Kansas summers than
 the DWARF IRIS, SEDUMS and CACTUS. All
 may be successfully moved all summer.

DWARF BEARDED IRIS

Three of any one variety 50c

Last summer it was our good fortune to obtain
 a fine assortment of the much talked of SASS hy-
 brids. These made fine growth during the late moist
 autumn days, and should make a fine crop of bloom.
 Also we grow three of the Pumila species. Light
 purple, deep purple, a very fine yellow, and the fol-
 lowing named varieties.

Bride (6 in) The most popular white among the
 dwarfs.

Coerulea (5 in) Very lovely sky blue.

Fairy (4 in) Dainty light blue. A clump of these
 flowers appear as a puff of mist.

Orange Queen (6 in) Uniform shade of deep yel-
 low.

Since all of these varieties are so tiny, we find it
 more satisfactory to sell not less than three (3) of
 a variety.

SEDUMS

All are hardy field grown plants in the best of
 condition for moving. The following varieties 15c
 each or two for 25c.

ACRE

ALBUM

EWERSII

GLAUCUM

KAMTSCHATICUM

SARMENTOSUM

SEXANGULARE

SPECTABILE

STOLONIFERUM

STOLONIFERUM COCCINEUM

Sedum PRUNIATUM FORSTERIANUM 25c
 per plant.

CACTUS

The cactus offered are all hardy, having stood
 out-doors all winter without protection. Prices on
 cactus range according to size and variety, 10 cents
 to \$2.50.
